

FENIL PATEL

Chicago, IL

+1 (630)-504-4149 | pfenilj@gmail.com | linkedin.com/in/pfenil

PROFESSIONAL SUMMARY

Results-oriented Software Engineer with a Master's in Computer Science and expertise in building scalable web applications and predictive data models. Proven ability to architect full-stack solutions (React, Node.js, Python) and optimize complex ETL pipelines, reducing processing time by up to 25%. Focused on developing high-impact AI/ML tools for Fintech and SaaS sectors.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), Java, SQL, TypeScript

Full Stack: React.js, Angular, Node.js, Express.js, HTML5/CSS3, RESTful APIs

Data & AI: Pandas, NumPy, Scikit-Learn, TensorFlow, NLP (NLTK), Power BI, Tableau

Infrastructure: AWS (EC2, S3), Docker, Git, MongoDB, PostgreSQL, Linux/Unix

PROFESSIONAL EXPERIENCE

Acodesoft Technologies

Gujarat, India

Software Engineer

Jan 2023 – Apr 2023

- Engineered a high-performance data processing engine using **Python**, achieving a **15% reduction** in server-side processing time through algorithm optimization.
- Designed and deployed scalable RESTful APIs to interface with SQL databases, optimizing stored procedures to improve data retrieval speeds by **15%**.
- Spearheaded unit testing protocols, increasing code coverage by **40%** and reducing deployment bugs in the production environment.
- Collaborated with senior architects to migrate legacy codebases to modern Python frameworks, enhancing system maintainability.

Dynamic Dreamz

Gujarat, India

Data Engineer & Analyst

Jan 2021 – Apr 2021

- Architected an automated ETL pipeline using **Python and SQL** to migrate unstructured data into a centralized Data Warehouse, reducing manual data processing time by **25%**.
- Optimized complex SQL queries for large-scale datasets, resulting in a **20% increase** in query execution speed for real-time reporting.
- Developed interactive dashboards in **Tableau** to visualize KPIs, enabling stakeholders to identify key market trends and drive data-backed decision-making.

TECHNICAL PROJECTS & ENGINEERING

AI-Powered Job Application Dashboard | React, Node.js, OpenAI API

July 2025 – Present

- Developing an automated dashboard to track and optimize job applications using GenAI workflows.
- Integrating OpenAI API to auto-tailor resumes and cover letters based on specific job descriptions.
- Building a Kanban-style interface for application status tracking using React and Firebase.

Predictive Fintech Modeling Engine | Python, Scikit-Learn, Power BI

July 2024 – Aug 2024

- Developed a predictive machine learning model to analyze historical IPO performance against macroeconomic indicators (GDP, Interest Rates), identifying investment success correlations with **85% accuracy**.
- Built a robust data pipeline using Pandas and NumPy to clean and transform financial datasets.
- Designed a Power BI dashboard with DAX measures to visualize risk factors and investment trends.

SaaS Utility Suite ("AlwaysBlue") | Java, React, Bootstrap

May 2023 – June 2023

- Built and deployed a full-stack web application suite featuring real-time tools (QR Generator, Text-to-Speech).
- Implemented a responsive UI with React and Bootstrap, ensuring low latency load times (<1s).
- Integrated 3rd-party APIs to extend functionality, handling 100+ concurrent requests efficiently.

Healthcare Workforce Analytics Platform | Selenium, Tableau, Python

Jan 2024 – Mar 2024

- Engineered a web scraper using **Selenium** to aggregate large-scale clinical staffing data from public sources.
- Conducting statistical analysis on workforce-to-patient ratios to identify critical staffing shortages.

EDUCATION

Illinois Institute of Technology

Chicago, IL

Master of Computer Science (CGPA: 3/4)

May 2025

- Key Coursework:** Machine Learning, Enterprise Web Applications, Advanced Software Engineering
- Leadership:** Led a 6-member agile development team to deliver 5 software projects with 100% on-time delivery.
